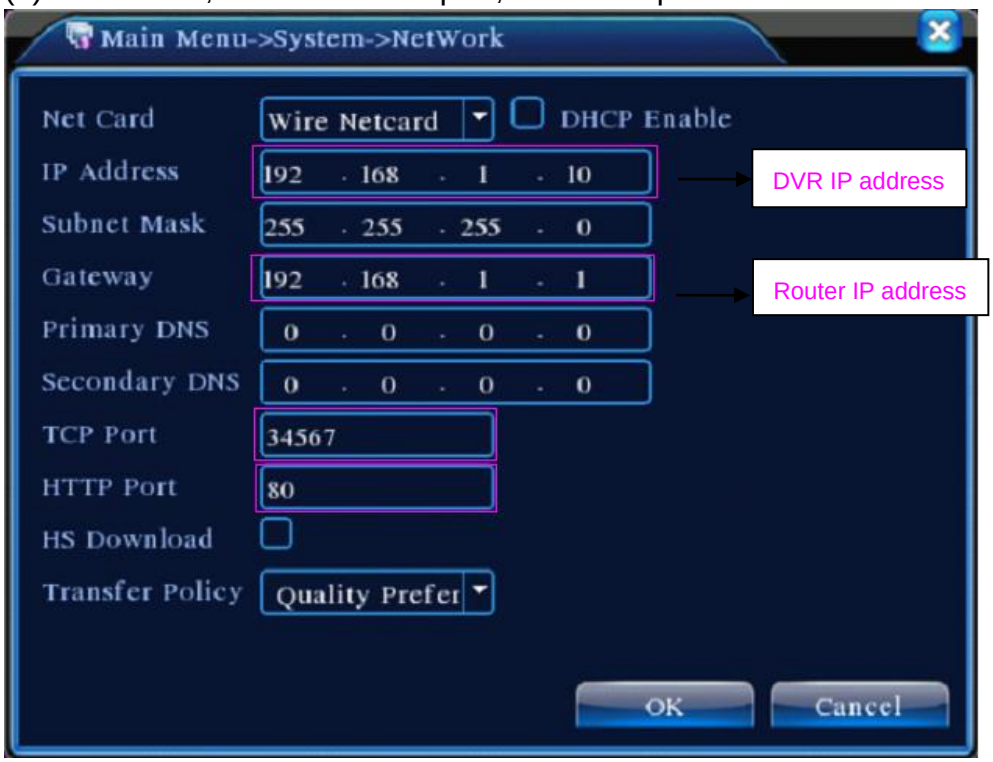
IP address and ports mapping in the router

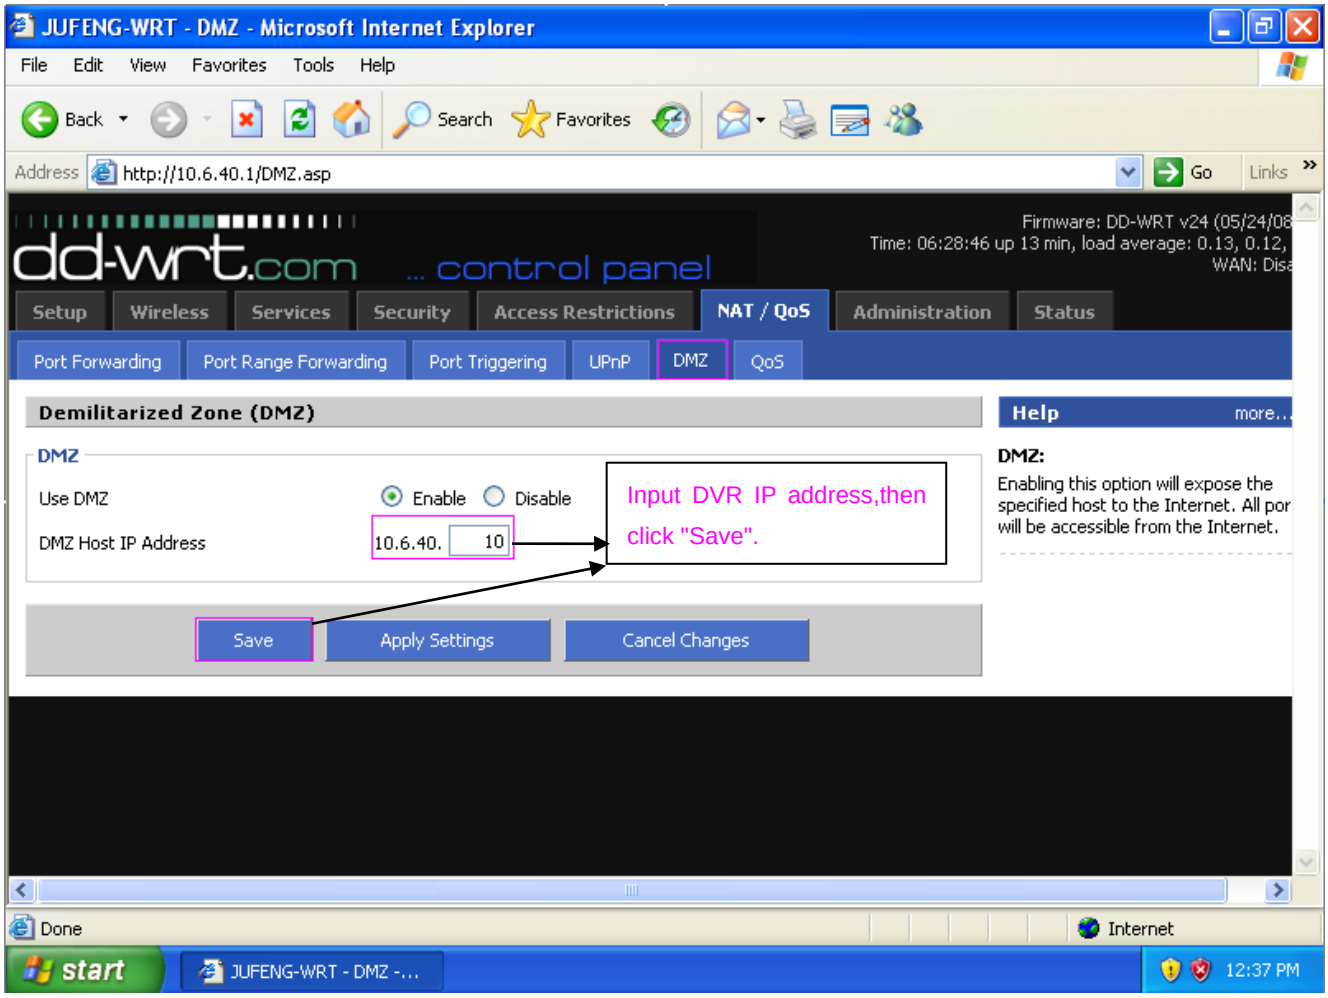
1.Set DVR IP address,TCP port,HTTP port and Mobile port.

(1) IP address,TCP and HTTP port,see below picture:

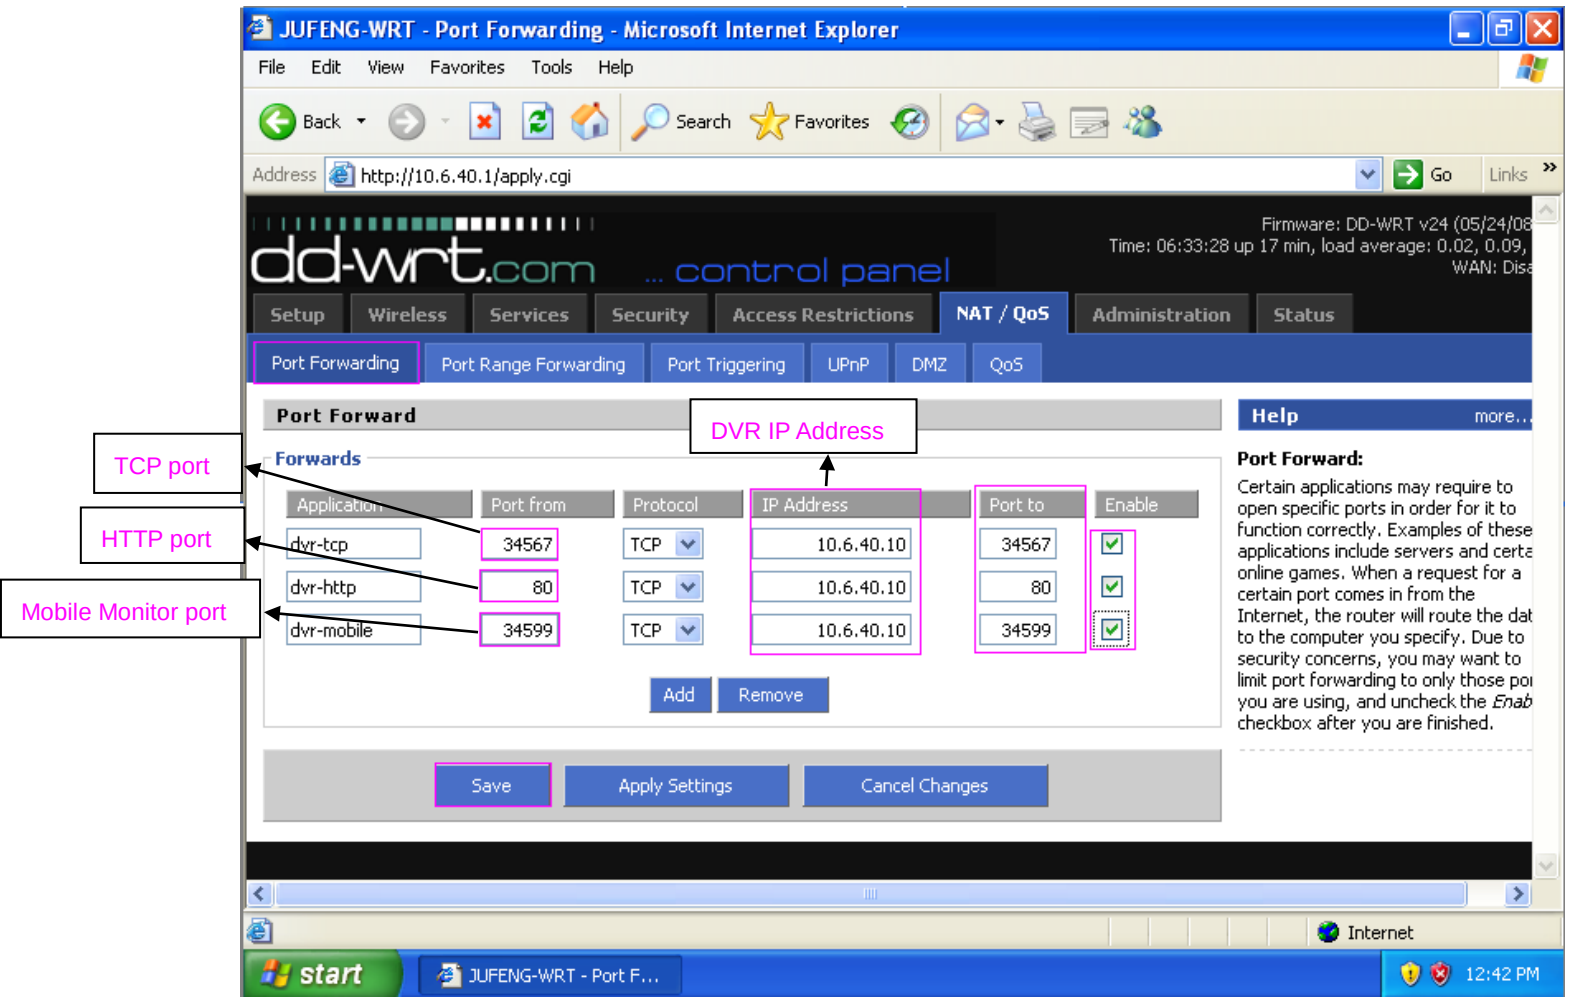


(2) Set Mobile Monitor port,see below picture:

2. **If there is only 1 DVR in the router,find your router ip address and visit it,then go to DMZ to input DVR IP address,see picture as below:**



3. **If there are multi DVR in the router,then set IP address and ports mapping as below picture:**



After input the above parameters,then click "Save".

4. IE,CMS and mobile remote view.

IE Browser: http://10.6.40.10:80

CMS: **IP address: 10.6.40.10**

Port: 34567

Mobile: **IP server: 10.6.40.10**

Port: 34599

For iPhone,pls use mobile to search "vMeye" in the www.appstore.com and install it online.
